Installed      : Yes
Status         : up-to-date
Source package : glibc-2.30-glibc11-1.9.5.jolla.src
Summary        : GNU C library shared libraries
Description     : The glibc package contains standard libraries which are used by
multiple programs on the system. In order to save disk space and
memory, as well as to make upgrading easier, common system code is
kept in one place and shared between programs. This particular package
contains the most important sets of shared libraries: the standard C
library and the standard math library. Without these two libraries, a
Linux system will not function.
