Information for package libhybris:
-----
Repository      : adaptation0
Name            : libhybris
Version         : 0.0.5.48-1.5.1.jolla
Arch            : aarch64
Vendor          : meego
Installed Size  : 326.2 KiB
Installed       : Yes (automatically)
Status          : up-to-date
Source package  : libhybris-0.0.5.48-1.5.1.jolla.src
Summary         : Utilize Bionic-based HW adaptations on glibc systems
Description     :
    Utilize Bionic-based HW adaptations on glibc systems.

Information for package libgbinder:
-----
Repository      : adaptation-common
Name            : libgbinder
Version         : 1.1.30-1.6.1.jolla
Arch            : aarch64
Vendor          : meego
Installed Size   : 79.3 KiB
Installed        : Yes (automatically)
Status          : up-to-date
Source package   : libgbinder-1.1.30-1.6.1.jolla.src
Summary         : Binder client library
Description      :
    C interfaces for Android binder

```

Information for package glibc:
-----
Repository      : jolla
Name            : glibc
Version         : 2.30+git11-1.9.5.jolla
Arch            : aarch64
Vendor          : meego
Installed Size  : 2.7 MiB
Installed        : Yes
Status          : up-to-date
Source package  : glibc-2.30+git11-1.9.5.jolla.src
Summary         : GNU C library shared libraries
Description     :

    The glibc package contains standard libraries which are used by
    multiple programs on the system. In order to save disk space and
    memory, as well as to make upgrading easier, common system code is
    kept in one place and shared between programs. This particular package
    contains the most important sets of shared libraries: the standard C
    library and the standard math library. Without these two libraries, a
    Linux system will not function.

```

Information for package busybox:
-----
Repository      : jolla
Name            : busybox
Version         : 1.34.1+git2-1.7.4.jolla
Arch            : aarch64
Vendor         : meego
Installed Size  : 250.7 KiB
Installed       : Yes (automatically)
Status          : up-to-date
Source package  : busybox-1.34.1+git2-1.7.4.jolla.src
Summary        : Single binary providing simplified versions of system commands
Description     :

    Busybox is a single binary which includes versions of a large number
    of system commands, including a shell.
